# Electric Vehicle Charging Solutions

Information brochure

# An **introduction**

As our country moves from diesel and unleaded vehicles to electric vehicles as part of our drive to go green, our mission is to keep you, your fleet and your customers on the go. We are a trusted advisor who has the knowledge and expertise to guide you to the correct solution to meet your charging infrastructure needs. Truly independent, we offer the right advice and can design, install, and maintain your charging infrastructure, alongside your charging management software, meeting all your needs.

## Iain Coleman

Head of EV Services

*"We are proud to be part of the UK's road to zero and to contribute to the environmental health of the country, helping to leave a positive legacy for future generations."*

# Our **mission**

Creating the right solution together, for you, your power supply and your EV driver demographics through our truly independent and tailored approach.

# Why Omega Red?

Trading since 1988, Omega Red is an expert in its field. A UK market leader in earthing, we are also vastly experienced in working within regulated industries and are CDM compliant, which means with us you're in safe hands.

Consultation, design and implementation of electric vehicle charging infrastructure is our latest future proofing offering. Our first class customer service and seamless delivery creates a truly bespoke, intelligent and, where appropriate, profitable solution.

## South Staffordshire Plc

Part of South Staffordshire Plc, Omega Red works closely with its sister companies, all of which are essential infrastructure specialists, to offer a seamless end-to-end solution without any outsourcing.

# Our **service**

We offer a **truly independent service** and are not tied to any one charger manufacturer. We can recommend the best hardware solution based on your needs, accommodating any specific requirements you may have.

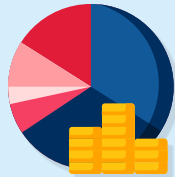

## Truly independent service

To ensure we provide you with the best solution, we are not tied to any charger manufacturer.

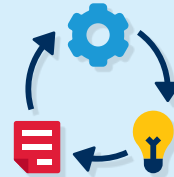

## Nationwide coverage

Our experts cover the length and breadth of the UK.

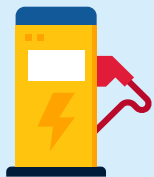

## Transparent pricing

Clear and upfront pricing with advice and guidance on all available grants.

## The end-to-end solution

Covering both civils and M&E, we deliver the concept, design, installation and maintenance.

## Wide variety of charger options

Fast, rapid and ultra rapid AC and DC hardware solutions from 7kw to 350kw charging speeds.

## Need a new supply source?

We manage the process with the relevant Distribution Network Operator (DNO).

# Government grants

## Did you know funding is available for EV charging infrastructure installations?

To ensure you receive the right grants for your installation, we can engage with the Office for Zero Emission Vehicles (OZEV), making it easier for you to go green.

Approved EV  
Charge Point Installer

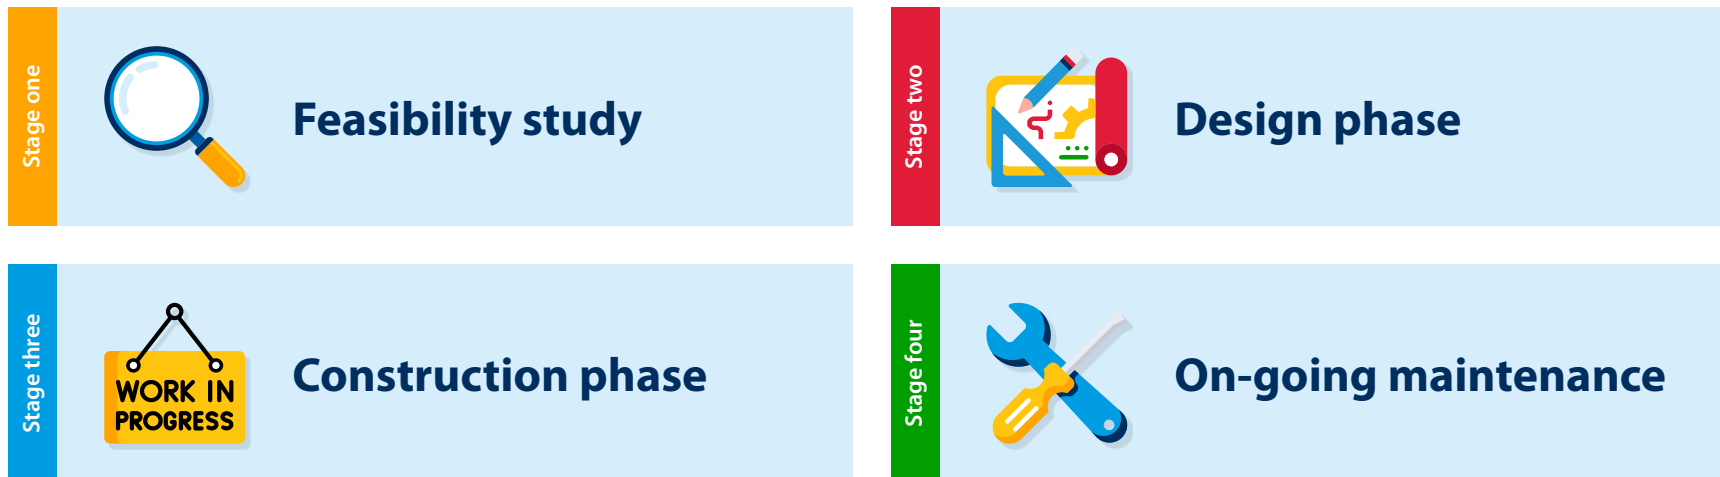

# A truly **bespoke service**

Whether you are looking to offer free charging for employees or visitors, or to generate income, we can offer a wide range of choices.

We can deliver an end-to-end service or support you with any specific element of the product lifecycle, through our broad range of services and our skilled and experienced team.

We offer fast, rapid and ultra rapid AC and DC hardware solutions, from 7kw through to 350kw charging speeds. Our recommended hardware choices are all OCPP compliant and tried and tested for reliability, useability and back-office compatibility.

# Our accreditations

With our high standard of service and safety, **you're in safe hands.**

As well as being an approved Office for Zero Emission Vehicles (OZEV) EV Charge Point Installer, we also boast a variety of accreditations and certifications that further demonstrate our commitment.
